- 

### Work Experience

#### *Junior Developer - TMA Solutions, Quy Nhon*

*(September 2022 - January 2024)*

---

### Projects

**\*\*Project: Employee Management System (Internship Project)\*\***

**\*March 2022 - May 2022\***

- Supported the development of an employee management web application using Laravel 8 for small businesses.

- Created RESTful APIs using PHP and Laravel 8 to handle data retrieval and updates, contributing to a more efficient backend system.
- Participated in regular meetings and planning sessions, gaining experience in Agile development practices.
- Debugged and resolved issues in existing code, improving application stability and performance.
- Collaborated with the team to optimize database queries, reducing data retrieval time by 15%.
- Documented project workflows and contributed to user manuals to support seamless project handover to the support team.

#### **\*\*Project: CDCB Website \*\***

**\*September 2022 - January 2023\***

- Supported the development of a dairy cow health management web application, aiming to streamline the monitoring and assessment of cow health.
- Implemented frontend components that enhanced the user interface, providing a smoother and more intuitive user experience.
- Participated in regular meetings and planning sessions, gaining experience in Agile development practices.
- Debugged and resolved issues in existing code, improving application stability and performance.

#### **\*\*Project: TrustMe Website\*\***

**\*February 2023 - June 2023\***

- Supported the development of a product traceability web application using ReactJS, aiming to streamline product traceability for small businesses.
- Implemented UI components in ReactJS, improving the UI to provide a smoother and more intuitive user experience.
- Participated in regular meetings and planning sessions, gaining experience in Agile development practices.

- Debugged and resolved issues in existing code, improving application stability and performance.

### **\*\*Project: Waste Data Analysis\*\***

**\*July 2023 - December 2023\***

- Supported analysis and optimized Excel data retrieval time according to customer requirements.
  - Implemented data analysis components in Python, improving retrieval time to reduce resource usage for customers.
  - Participated in regular meetings and planning sessions, gaining experience in Agile development activities.
  - Debugged and resolved issues in existing code, improving application stability and performance.
- 

### **Education**

#### **Bachelor of Information Technology, Quy Nhon University (August 2018 - September 2022)**

- Participated in team-building activities and IT festivals organized by the department
  - Volunteered for blood donation drives
-
